PROFESSIONAL SUMMARY

Motivated Full Stack Developer with hands-on experience building modern web and mobile applications. Proficient in Next.js, Node.js/Express.js, MySQL, TypeScript, and Tailwind CSS. Skilled in REST API development, secure authentication systems, and clean architecture. Passionate about artificial intelligence, digital innovation, and technology for social impact, with hands-on experience contributing to AI-powered healthcare solutions. Eager to apply technical expertise and continuously learn while contributing to global digital transformation initiatives.

PROFESSIONAL EXPERIENCE

Full Stack Developer | Popup bits *Feb 2025 – March 2026 (1yr 1 mos)*

Kathmandu, On-site

- Built cross-platform mobile UIs using Flutter's widget system and state management libraries.
- Integrated RESTful APIs into mobile apps — handled JSON parsing, error states, and token-based authentication.
- Collaborated via Git/GitHub with feature branches, pull requests, and code reviews.
- Design and optimize MySQL databases including schema design, query optimization, and performance tuning for production workloads.
- Develop secure RESTful APIs with robust user authentication using JWT and session management best practices.
- Implement responsive, accessible UIs using TypeScript and Tailwind CSS across multiple projects.
- Manage containerized development and deployment environments using Docker; participate in AWS-based deployment pipelines.
- Collaborate with product teams in sprint planning and code reviews; maintain codebases using Git and GitHub.

Selected Technical Projects

MINA: <https://mina-backend-1.onrender.com/docs>

Built an AI-powered telemedicine platform for rural Nepal, using LightGBM to check symptoms across 20+ diseases. Also built the backend: secure APIs, real-time chat, and video consultations so patients could actually talk to a certified doctor instead of just getting a prediction.

Doctor-sab: <https://github.com/bhattabhuwan/ds>

Part of a university team, I helped build an AI-powered healthcare app using Spring Boot and the DeepSeek R1 model. My focus was the real-time consultation feature, letting patients in remote areas connect with doctors without traveling.

Saud Leather(E-commerce):<https://www.saudleather.com.np>

Developed a full-stack e-commerce platform for a premium leather goods brand, enabling customers to browse, customize, and purchase high-quality leather products online. The platform streamlines inventory, order management, and secure online payments while providing a seamless shopping experience across desktop and mobile devices.

BLA Logistic: <https://blalogistic.com/>

Built with FastAPI and Supabase, this platform tracks vehicles in real time, automates shipping tasks, and uses MapTiler to work out the best routes. It also handles user accounts and permissions.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Kotlin, Java, Dart

Frontend: Next.js, React, Tailwind CSS, TypeScript, HTML5, XML Layouts

Backend: Node.js, Express.js, Python, REST API Design, JWT Auth, Firebase (Auth, Firestore, FCM)

Databases: MySQL (schema design, query optimization), Firebase Firestore, Room (Android)

Architecture: Full Stack MVC/MVVM, Clean Architecture, Component-Based Design

DevOps & Tools: Docker, AWS (deployment), Git, GitHub, Android Studio, Gradle

AI & Emerging Technologies: Prompt Engineering, Large Language Models (LLMs), OpenAI API, n8n

EDUCATION

Bachelor of Computer Applications (BCA) | Kantipur City College

2021 – 2026 • Kathmandu (Expected Graduation: November 2026)

Relevant coursework: Data Structures & Algorithms, Software Engineering, Database Management Systems, Object-Oriented Programming, Web Technologies, Software Project Management

High School Diploma – civil Sub-Engineering (TVET) | Mahendar secondary school

2019 – 2021 • Datedeldhura
